FULL STACK DEVELOPER

Full Stack Web Developer with over 1.5 years of experience specializing in JavaScript, NodeJS, AngularJS, NextJS, ExpressJS and MongoDB. Adept at building scalable, user-friendly applications, with a focus on enhancing performance and contributing to the company's growth through innovation and attention to detail. Looking to leverage my expertise in MEAN stack development and problem-solving in a dynamic environment.

WORK EXPERIENCE

Software Engineer | Outgrow

March 2023 - present

- Managed **webhooks** and **integrated** 50+ CRMs (e.g., Salesforce, Google Sheets) for seamless lead syncing.
- Utilized Burp Suite to identify and resolve critical **security vulnerabilities** in API endpoints.
- Developed and optimized **AWS Lambda** functions to enhance analytics generation, improving performance by 50% through more efficient MongoDB query optimization.
- Built a real-time quiz hosting feature using **sockets**, enabling moderators to control questions and view participant statistics in graphical format.
- Implemented a comprehensive **logging system** for clients tracking to their team activity (login/logout, quiz creation/deletion, permission changes) via webhooks.
- Upgraded third-party credential encryption methods to ensure secure data syncing, preventing potential disruptions for numerous clients.
